### 1 [A firmware monitor to support vertical migration decisions in the UNIX operating system](#)

☒ B. Holtkamp, H. Kaestner

☒ October 1982 **ACM SIGMICRO Newsletter , Proceedings of the 15th annual workshop on Microprogramming MICRO 15**, Volume 13 Issue 4

**Publisher:** IEEE Press, ACM Press

 Full text available: ☒ [pdf\(686.64 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

From a methodological point of view vertical migration involves the following four steps: identification of migration objects, prediction of expected system improvements, implementation, and verification of the results. In this paper a firmware monitor is presented as a support tool for the first and fourth step. The application environment for this monitor is a PDP-11/60 with writable control store running the UNIX operating system. Based upon a UNIX system model the requirement ...

### 2 [Studying long-term system use](#)

☒ Judy Kay, Richard C. Thomas

☒ July 1995 **Communications of the ACM**, Volume 38 Issue 7

### 3 [Use of a soundcard in teaching audio frequency and analog modem communications](#)

☒ Martin H. Levin

☒ June 1999 **ACM SIGCSE Bulletin , Proceedings of the 4th annual SIGCSE/SIGCUE ITiCSE conference on Innovation and technology in computer science education ITiCSE '99**, Volume 31 Issue 3

**Publisher:** ACM Press

 Full text available: ☒ [pdf\(636.55 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Sound cards have become standard features of personal computers in the home, office and classroom. This paper demonstrates the usefulness of these inexpensive devices in the teaching of some of the basic and not so basic concepts of communications. These devices can be very effective in the explanation of amplitude, frequency and frequency multiplexed circuits, as well as modem handshake standards.

**Keywords:** analog telephone systems, dual tone multiple frequencies, handshakes, soundcards, telephone modems, visual pictorization

4 A trace-based evaluation of adaptive error correction for a wireless local area network

David A. Eckhardt, Peter Steenkiste

December 1999 **Mobile Networks and Applications**, Volume 4 Issue 4

**Publisher:** Kluwer Academic Publishers

Full text available:  [pdf\(243.29 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

Wireless transmissions are highly susceptible to noise and interference. As a result, the error characteristics of a wireless link may vary widely depending on environmental factors such as location of the communicating systems and activity of competing radiation sources, making error control a difficult task. In this paper we evaluate error control strategies for a wireless LAN. Based on low-level packet traces of WaveLAN, we first show that forward error correction (FEC) is effective in r ...

5 A framework for reducing the cost of instrumented code

 Matthew Arnold, Barbara G. Ryder

May 2001 **ACM SIGPLAN Notices , Proceedings of the ACM SIGPLAN 2001 conference on Programming language design and implementation PLDI '01**, Volume 36 Issue 5

**Publisher:** ACM Press

Full text available:  [pdf\(1.78 MB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

Instrumenting code to collect profiling information can cause substantial execution overhead. This overhead makes instrumentation difficult to perform at runtime, often preventing many known *offline* feedback-directed optimizations from being used in online systems. This paper presents a general framework for performing *instrumentation sampling* to reduce the overhead of previously expensive instrumentation. The framework is simple and effective, using code-duplication and *coun* ...

6 Physical layer driven protocol and algorithm design for energy-efficient wireless sensor networks

 Eugene Shih, Seong-Hwan Cho, Nathan Ickes, Rex Min, Amit Sinha, Alice Wang, Anantha Chandrakasan

July 2001 **Proceedings of the 7th annual international conference on Mobile computing and networking**

**Publisher:** ACM Press

Full text available:  [pdf\(782.22 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

The potential for collaborative, robust networks of microsensors has attracted a great deal of research attention. For the most part, this is due to the compelling applications that will be enabled once wireless microsensor networks are in place; location-sensing, environmental

sensing, medical monitoring and similar applications are all gaining interest. However, wireless microsensor networks pose numerous design challenges. For applications requiring long-term, robust sensing, such as milit ...

7 A proposal for an architectural approach which apparently solves all known software-based internal computer security problems

Richard LeRoy Routh

July 1984 **ACM SIGOPS Operating Systems Review**, Volume 18 Issue 3

**Publisher:** ACM Press

Full text available: pdf(468.83 KB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#)

Computer security violations have become a serious threat to both corporate and national defense activities. By extending the work done by Myers et. al. in the development of the capability based addressing system for the SWORD at IBM, a Computer architectural approach has been developed which solves all known software based internal computer security problems. The problems solved include (but are not restricted to): (1) Violations of priority and access privileges by highly skilled users, (2) The ...

8 On the cost of monitoring and reorganization of object bases for clustering

Carsten A. Gerlhof, Alfons Kemper, Guido Moerkotte

September 1996 **ACM SIGMOD Record**, Volume 25 Issue 3

**Publisher:** ACM Press

Full text available: pdf(606.93 KB)

Additional Information: [full citation](#), [abstract](#), [citations](#), [index terms](#)

Clustering is one of the most effective means to enhance the performance of object base applications. Consequently, many proposals exist for algorithms computing good object placements depending on the application profile. However, in an effective object base reorganization tool the clustering algorithm is only one constituent. In this paper, we report on our object base reorganization tool that covers all stages of reorganizing the objects: the application profile is determined by a monito ...

9 Measurement and analysis of instruction use in the VAX-11/780

Douglas W. Clark, Henry M. Levy

April 1982 **Proceedings of the 9th annual symposium on Computer Architecture**

**Publisher:** IEEE Computer Society Press

Full text available: pdf(723.49 KB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

This paper reports measurements of instruction set use on the VAX-11/780 computer. A hardware monitor was used to measure the frequency and time taken by each VAX instruction. Data from benchmark programs, a compiler, a linker, and a synthetic timesharing workload are reported. Results show that although some programs rely on a small set of instructions, different applications use the instruction set in different ways.

10 The design and development of a dynamic program behavior measurement tool for the Intel 8086/88

R. J. Schwartz

June 1989 **ACM SIGARCH Computer Architecture News**, Volume 17 Issue 4

**Publisher:** ACM Press

Full text available:  pdf(906.01 KB) Additional Information: [full citation](#), [abstract](#), [index terms](#)

When modeling a computer system, it is necessary to study the system's dynamic behavior. Examples of this behavior are branching frequency and operating system usage patterns. The dynamic properties of the system characterize its performance. Models make assumptions about such behavior, but require genuine data to validate the assumptions. In this article, we present a measurement tool that will collect and analyze dynamic program information for the Intel 8086/88. The design and development of ...

**11** [The SHRIMP performance monitor: design and applications](#)

 Margaret Martonosi, Douglas W. Clark, Malena Mesarina  
January 1996 **Proceedings of the SIGMETRICS symposium on Parallel and distributed tools**  
**Publisher:** ACM Press

Full text available:  pdf(1.01 MB) Additional Information: [full citation](#), [references](#), [citations](#), [index terms](#)

**12** [The mimola design system: Tools for the design of digital processors](#)

Peter Marwedel  
June 1984 **Proceedings of the 21st conference on Design automation**  
**Publisher:** IEEE Press

Full text available:  pdf(642.29 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

The MIMOLA design method is a method for the design of digital processors from a very high-level behavioral specification. A key feature of this method is the synthesis of a processor from a description of programs which are expected to be typical for the applications of that processor. Design cycles, in which the designer tries to improve automatically generated hardware structures, are supported by a retargetable microcode generator and by an utilization and performance analyzer. This paper ...

**13** [Residual test coverage monitoring](#)

Christina Pavlopoulou, Michal Young  
May 1999 **Proceedings of the 21st international conference on Software engineering**  
**Publisher:** IEEE Computer Society Press

Full text available:  pdf(979.59 KB) Additional Information: [full citation](#), [references](#), [citations](#), [index terms](#)

**Keywords:** coverage, instrumentation, testing

**14** [An analysis of a mesa instruction set using dynamic instruction frequencies](#)

 Gene McDaniel  
March 1982 **ACM SIGARCH Computer Architecture News , ACM SIGPLAN Notices , Proceedings of the first international symposium on Architectural support for programming languages and operating systems ASPLOS-I, Volume 10 , 17 Issue 2 , 4**  
**Publisher:** ACM Press

Full text available:  [pdf\(948.65 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

The Mesa architecture is implemented on a variety of processors, and dynamic instruction frequency data for two programs is used to analyze the architecture in an implementation independent fashion. The Mesa compiler allocates variables in an order based upon their static frequency of use, and measurements are provided that show that these static predictions predict run time usage as well. We provide an evaluation of the advantages and costs of Mesa's compact byte encoding, its r ...

**15** [Measuring VAX 8800 performance with a histogram hardware monitor](#)

 D. W. Clark, P. J. Bannon, J. B. Keller

May 1988 **ACM SIGARCH Computer Architecture News , Proceedings of the 15th Annual International Symposium on Computer architecture ISCA '88**, Volume 16 Issue 2

**Publisher:** IEEE Computer Society Press, ACM Press

Full text available:  [pdf\(1.04 MB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

This paper reports the results of a study of VAX 8800 processor performance using a hardware monitor that collects histograms of the processor's micro-PC and memory bus status. The monitor keeps a count of all machine cycles executed at each micro-PC location, as well as counting all occurrences of each bus transaction. It can measure a running system without interfering with it, and this paper's results are based on measurements of live timesharing. Because the 8800 is a microcoded machine ...

**16** [Arithmetic coding revisited](#)

 Alistair Moffat, Radford M. Neal, Ian H. Witten

July 1998 **ACM Transactions on Information Systems (TOIS)**, Volume 16 Issue 3

**Publisher:** ACM Press

Full text available:  [pdf\(487.26 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

Over the last decade, arithmetic coding has emerged as an important compression tool. It is now the method of choice for adaptive coding on myltisymbol alphabets because of its speed, low storage requirements, and effectiveness of compression. This article describes a new implementation of arithmetic coding that incorporates several improvements over a widely used earlier version by Witten, Neal, and Cleary, which has become a de facto standard. These improvements include f ...

**Keywords:** approximate coding, arithmetic coding, text compression, word-based model

**17** [The design and implementation of tripwire: a file system integrity checker](#)

 Gene H. Kim, Eugene H. Spafford

November 1994 **Proceedings of the 2nd ACM Conference on Computer and communications security**

**Publisher:** ACM Press

Full text available:  [pdf\(1.22 MB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

At the heart of most computer systems is a file system. The file system contains user data, executable programs, configuration and authorization information, and (usually) the base

executable version of the operating system itself. The ability to monitor file systems for unauthorized or unexpected changes gives system administrators valuable data for protecting and maintaining their systems. However, in environments of many networked heterogeneous platforms with different policies and softw ...

#### 20 Local networks

 William Stallings

March 1984 **ACM Computing Surveys (CSUR)**, Volume 16 Issue 1

**Publisher:** ACM Press

Full text available:  [pdf\(3.01 MB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#), [review](#)

The rapidly evolving field of local network technology has produced a steady stream of local network products in recent years. The IEEE 802 standards that are now taking shape, because of their complexity, do little to narrow the range of alternative technical approaches and at the same time encourage more vendors into the field. The purpose of this paper is to present a systematic, organized overview of the alternative architectures for and design approaches to local networks.

# 1 [A firmware monitor to support vertical migration decisions in the UNIX operating system](#)

☒ B. Holtkamp, H. Kaestner

☒ October 1982 **ACM SIGMICRO Newsletter , Proceedings of the 15th annual workshop on Microprogramming MICRO 15**, Volume 13 Issue 4

**Publisher:** IEEE Press, ACM Press

 Full text available: ☒ [pdf\(686.64 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

From a methodological point of view vertical migration involves the following four steps: identification of migration objects, prediction of expected system improvements, implementation, and verification of the results. In this paper a firmware monitor is presented as a support tool for the first and fourth step. The application environment for this monitor is a PDP-11/60 with writable control store running the UNIX operating system. Based upon a UNIX system model the requirement ...

# 2 [Systems 1: A wireless sensor network For structural monitoring](#)

☒ Ning Xu, Sumit Rangwala, Krishna Kant Chintalapudi, Deepak Ganesan, Alan Broad, Ramesh Govindan, Deborah Estrin

 November 2004 **Proceedings of the 2nd international conference on Embedded networked sensor systems**
**Publisher:** ACM Press

 Full text available: ☒ [pdf\(731.28 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Structural monitoring---the collection and analysis of structural response to ambient or forced excitation---is an important application of networked embedded sensing with significant commercial potential. The first generation of sensor networks for structural monitoring are likely to be data acquisition systems that collect data at a single node for centralized processing. In this paper, we discuss the design and evaluation of a wireless sensor network system (called Wisden for structural data) ...

### 3 System-level power optimization: techniques and tools

 Luca Benini, Giovanni de Micheli

 April 2000 **ACM Transactions on Design Automation of Electronic Systems (TODAES)**,  
Volume 5 Issue 2

**Publisher:** ACM Press

Full text available:  pdf(385.22 KB) Additional Information: [full citation](#), [abstract](#), [references](#),  
[citations](#), [index terms](#)

This tutorial surveys design methods for energy-efficient system-level design. We consider electronic systems consisting of a hardware platform and software layers. We consider the three major constituents of hardware that consume energy, namely computation, communication, and storage units, and we review methods of reducing their energy consumption. We also study models for analyzing the energy cost of software, and methods for energy-efficient software design and compilation. This survey ...

### 4 Virtual machine monitors: Terra: a virtual machine-based platform for trusted computing

 Tal Garfinkel, Ben Pfaff, Jim Chow, Mendel Rosenblum, Dan Boneh

 October 2003 **Proceedings of the nineteenth ACM symposium on Operating systems principles**

**Publisher:** ACM Press

Full text available:  pdf(140.31 KB) Additional Information: [full citation](#), [abstract](#), [references](#),  
[citations](#), [index terms](#)

We present a flexible architecture for trusted computing, called Terra, that allows applications with a wide range of security requirements to run simultaneously on commodity hardware. Applications on Terra enjoy the semantics of running on a separate, dedicated, tamper-resistant hardware platform, while retaining the ability to run side-by-side with normal applications on a general-purpose computing platform. Terra achieves this synthesis by use of a *trusted virtual machine monitor* (TVMM) ...

### 6 Pen computing: a technology overview and a vision

 André Meyer

 July 1995 **ACM SIGCHI Bulletin**, Volume 27 Issue 3

**Publisher:** ACM Press

Full text available:  pdf(5.14 MB) Additional Information: [full citation](#), [abstract](#), [citations](#), [index terms](#)

This work gives an overview of a new technology that is attracting growing interest in public as well as in the computer industry itself. The visible difference from other technologies is in the use of a pen or pencil as the primary means of interaction between a user and a machine, picking up the familiar pen and paper interface metaphor. From this follows a set of consequences that will be analyzed and put into context with other emerging technologies and visions. Starting with a short historic ...

7 Deployment experience: Design and deployment of industrial sensor networks: experiences from a semiconductor plant and the north sea

 Lakshman Krishnamurthy, Robert Adler, Phil Buonadonna, Jasmeet Chhabra, Mick Flanigan, Nandakishore Kushalnagar, Lama Nachman, Mark Yarvis

November 2005 **Proceedings of the 3rd international conference on Embedded networked sensor systems SenSys '05**

**Publisher:** ACM Press

Full text available:  pdf(677.48 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Sensing technology is a cornerstone for many industrial applications. Manufacturing plants and engineering facilities, such as shipboard engine rooms, require sensors to ensure product quality and efficient and safe operation. We focus on one representative application, preventative equipment maintenance, in which vibration signatures are gathered to predict equipment failure. Based on application requirements and site surveys, we develop a general architecture for this class of industrial appli ...

**11** Software safety: why, what, and how

 Nancy G. Leveson

June 1986 **ACM Computing Surveys (CSUR)**, Volume 18 Issue 2

**Publisher:** ACM Press

Full text available:  [pdf\(4.18 MB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#), [review](#)

Software safety issues become important when computers are used to control real-time, safety-critical processes. This survey attempts to explain why there is a problem, what the problem is, and what is known about how to solve it. Since this is a relatively new software research area, emphasis is placed on delineating the outstanding issues and research topics.

**12** Implementation aspects of a SPARC V9 complete machine simulator

Bill Clarke, Adam Czezowski, Peter Strazdins

January 2002 **Australian Computer Science Communications , Proceedings of the twenty-fifth Australasian conference on Computer science - Volume 4 CRPITS '02**, Volume 24 Issue 1

**Publisher:** Australian Computer Society, Inc. , IEEE Computer Society Press

Full text available:  [pdf\(1.33 MB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

In this paper we present work in progress in the development of a complete machine simulator for the UltraSPARC, an implementation of the SPARC V9 architecture. The complexity of the

UltraSPARC ISA presents many challenges in developing a reliable and yet reasonably efficient implementation of such a simulator. Our implementation includes a heavily object-oriented design for the simulator modules and infrastructure, caching of repeated computations for performance, adding an OS (system call) emu ...

### 13 Survey of code-size reduction methods

 Árpád Beszédes, Rudolf Ferenc, Tibor Gyimóthy, André Dolenc, Konsta Karsisto  
September 2003 **ACM Computing Surveys (CSUR)**, Volume 35 Issue 3

**Publisher:** ACM Press

Full text available:  pdf(443.89 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Program code compression is an emerging research activity that is having an impact in several production areas such as networking and embedded systems. This is because the reduced-sized code can have a positive impact on network traffic and embedded system costs such as memory requirements and power consumption. Although code-size reduction is a relatively new research area, numerous publications already exist on it. The methods published usually have different motivations and a variety of appli ...

### 14 Physical interface: Fine-grained network time synchronization using reference broadcasts

 Jeremy Elson, Lewis Girod, Deborah Estrin  
December 2002 **ACM SIGOPS Operating Systems Review**, Volume 36 Issue SI

**Publisher:** ACM Press

Full text available:  pdf(2.10 MB) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#)

Recent advances in miniaturization and low-cost, low-power design have led to active research in large-scale networks of small, wireless, low-power sensors and actuators. Time synchronization is critical in sensor networks for diverse purposes including sensor data fusion, coordinated actuation, and power-efficient duty cycling. Though the clock accuracy and precision requirements are often stricter than in traditional distributed systems, strict energy constraints limit the resources available ...

### 15 Balancing performance and flexibility with hardware support for network architectures

 Ilija Hadžić, Jonathan M. Smith  
November 2003 **ACM Transactions on Computer Systems (TOCS)**, Volume 21 Issue 4

**Publisher:** ACM Press

Full text available:  pdf(719.03 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

The goals of performance and flexibility are often at odds in the design of network systems. The tension is common enough to justify an architectural solution, rather than a set of context-specific solutions. The Programmable Protocol Processing Pipeline (P4) design uses programmable hardware to selectively accelerate protocol processing functions. A set of field-

programmable gate arrays (FPGAs) and an associated library of network processing modules implemented in hardware are augmented with so ...

**16** A relational approach to monitoring complex systems

 Richard Snodgrass

 May 1988 **ACM Transactions on Computer Systems (TOCS)**, Volume 6 Issue 2

**Publisher:** ACM Press

Full text available:  [pdf\(3.42 MB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#), [review](#)

Monitoring is an essential part of many program development tools, and plays a central role in debugging, optimization, status reporting, and reconfiguration. Traditional monitoring techniques are inadequate when monitoring complex systems such as multiprocessors or distributed systems. A new approach is described in which a historical database forms the conceptual basis for the information processed by the monitor. This approach permits advances in specifying the low-level data collection, ...

**17** The interactive performance of SLIM: a stateless, thin-client architecture

 Brian K. Schmidt, Monica S. Lam, J. Duane Northcutt

 December 1999 **ACM SIGOPS Operating Systems Review , Proceedings of the seventeenth ACM symposium on Operating systems principles SOSP '99**, Volume 33 Issue 5

**Publisher:** ACM Press

Full text available:  [pdf\(1.79 MB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

Taking the concept of thin clients to the limit, this paper proposes that desktop machines should just be simple, stateless I/O devices (display, keyboard, mouse, etc.) that access a shared pool of computational resources over a dedicated interconnection fabric --- much in the same way as a building's telephone services are accessed by a collection of handset devices. The stateless desktop design provides a useful mobility model in which users can transparently resume their work on any desktop c ...

**18** XRAY: Instrumentation for multiple computers

 Russ Blake

 May 1980 **ACM SIGMETRICS Performance Evaluation Review , Proceedings of the 1980 international symposium on Computer performance modelling, measurement and evaluation PERFORMANCE '80**, Volume 9 Issue 2

**Publisher:** ACM Press

Full text available:  [pdf\(905.42 KB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

XRAY presents a global view of the performance of hardware and software components on multiple, distributed computers. The set of components chosen for measurement can be changed at any time throughout a network of systems, and can be selected to minimize data collection time and measurement space. In the course of normal activities the operating system executes firmware which increments counters for the measured components. Periodically, the counters are

recorded in an ordinary file by a p ...

**19** Experience with an adaptive globally-synchronizing clock algorithm

 Cheng Liao, Margaret Martonosi, Douglas W. Clark

 June 1999 **Proceedings of the eleventh annual ACM symposium on Parallel algorithms and architectures**

**Publisher:** ACM Press

Full text available:  [pdf\(1.14 MB\)](#)

Additional Information: [full citation](#), [references](#), [citations](#), [index terms](#)

**20** Security: SECA: security-enhanced communication architecture

 Joel Coburn, Srivaths Ravi, Anand Raghunathan, Srimat Chakradhar

 September 2005 **Proceedings of the 2005 international conference on Compilers, architectures and synthesis for embedded systems CASES '05**

**Publisher:** ACM Press

Full text available:  [pdf\(396.53 KB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

In this work, we propose and investigate the idea of enhancing a System-on-Chip (SoC) communication architecture (the fabric that integrates system components and carries the communication traffic between them) to facilitate higher security. We observe that a wide range of common security attacks are manifested as abnormalities in the system-level communication traffic. Therefore, the communication architecture, with its global system-level visibility, can be used to detect them. The communicati ...

Scholar Results 1 - 10 of about 392 for **monitor\* bit frequency hardware firmware**. (0.11 seconds)

A 8.75-MBaud Single-Chip Digital QAM Modulator with **Frequency**-Agility and Beamforming Diversity

K Cho, H Samueli, CN MicroSyst, CA Los Angeles - IEEE 2000 Custom Integrated Circuits Conference, 2000 - [ieeexplore.ieee.org](http://ieeexplore.ieee.org)

... Seven MSB bits out of the 32-bit output are used ... a spectrum analyzer is used to **monitor** the spectra ... QAM Modulation Output Spectrums with Various IF-frequency ...

Cited by 8 - [Web Search](#) - [ieeexplore.ieee.org](http://ieeexplore.ieee.org)

Prototype Real-Time Baseband Signal Combiner

LD Howard, R **Frequency**, M SubsystemsSection - The Telecommunications and Data Acquisition Progress Report, ..., 1980 - [tmo.jpl.nasa.gov](http://tmo.jpl.nasa.gov)

... LD Howard Radio **Frequency** and Microwave SubsystemsSection ... (3) Control and **monitor** functions performed remotely from a ... These routines allow **bit** level control of ...

[View as HTML](#) - [Web Search](#) - [adsabs.harvard.edu](http://adsabs.harvard.edu) - [adsabs.harvard.edu](http://adsabs.harvard.edu)

An S-FSK Power Line Carrier Modem for Utility AMR applications

B Goffart, P Desneux, T Verbeure, P Gonthier, R ... - Metering and Tariffs for Energy Supply, 1999. Ninth ..., 1999 - [ieeexplore.ieee.org](http://ieeexplore.ieee.org)

... The modem features the 3 possible node configurations: server, client and **monitor** configuration ... The output **frequency** of the PLL is 8 time the **bit frequency**. ...
